The MAILING DATE of this communication ap	William H. Beisner	1744 correspondence address
Period for Reply		
A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.  Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.  If the period for reply specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.  If NO period for reply sepecified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.  Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).  Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b). Art Unit: 1744

## DETAILED ACTION

## Priority

1. Applicant has not complied with one or more conditions for receiving the benefit of an earlier filing date under 35 U.S.C. 120 as follows:

An application in which the benefits of an earlier application are desired must be copending with the prior application or with an application similarly entitled to the benefit of the filing date of the prior application.

The instant application is not or was not copending with application 09/210,027 which was filed 12/11/98 and issued on 3/28/00. The instant application was filed on 12/31/00 so it cannot be copending with 09/210,027.

#### Oath/Declaration

The oath or declaration is defective. A new oath or declaration in compliance with 37 CFR 1.67(a) identifying this application by application number and filing date is required. See MPEP §§ 602.01 and 602.02.

The oath or declaration is defective because:

It does not include the signature of the first listed invention, Rolfe C. Anderson.

# Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

Art Unit: 1744

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

Claims 90 and 91 are rejected under 35 U.S.C. 102(b) as being anticipated by Handique et al.(US 6,130,098).

The reference of Handique et al. discloses a method of repeatedly measuring a known volume of a fluid in a miniature fluidic system which includes providing a device, 10, with a first chamber of a known volume defined between vent, 50, and hydrophobic region, 40, and a second chamber defined between region, 40 and vent, 70. The first chamber is filled through port, 20, and a first aliquot of liquid (L) is transported to the second chamber by providing a pressure to vent, 50. This process is repeated to provide a number of known volumes of sample within the fluidic system.

# Claim Rejections - 35 USC § 103

- 2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
  - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

The factual inquiries set forth in *Graham* v. *John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.

Art Unit: 1744

- 2. Ascertaining the differences between the prior art and the claims at issue.
- 3. Resolving the level of ordinary skill in the pertinent art.
- Considering objective evidence present in the application indicating obviousness or nonobviousness.

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

3. Claims 90 and 91 are rejected under 35 U.S.C. 103(a) as being unpatentable over Gibbons et al.(US 4,946,795).

The reference of Gibbons et al. discloses a microfabricated device which includes a first chamber, 20, and second chamber, 40. In use, chamber, 20, is vented through channel, 12, and chamber, 40, is vented through channel, 60. The device is used by adding a sample to zone, 10, wherein a known aliquot of sample flows into chamber, 20. Fluid is applied to chamber, 30, so as to transport the first aliquot in chamber, 20, to chamber, 40.

The instant claims differ by repeating the filling and transporting steps.

While the reference of Gibbons et al. only discloses a single use of this device, it would have been obvious to one of ordinary skill in the art to provide the device (chamber, 10) with an additional sample for the known and expected result of dilution and mixing of subsequent

Application/Control Number: 09/751,658

Art Unit: 1744

samples when contamination of the second sample by the first sample is not of concern when operating the liquid sample device.

## Conclusion

4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to William H. Beisner whose telephone number is 703-308-4006. The examiner can normally be reached on Tues. to Fri. and alt. Mon. from 6:40am to 4:10pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Robert Warden can be reached on 703-308-2920. The fax phone numbers for the organization where this application or proceeding is assigned are 703-305-7718 for regular communications and 703-305-3599 for After Final communications.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is 703-308-0661.
